

Thank you for your purchase!

If you are Military or in Law Enforcement, thank you for your service and protecting our constitutional rights.

TO ADJUST YOUR BRACELET: There is one cord on both sides of the weave that will make the loop smaller or bigger on each side of the weave. (Shaded area in Figure) This will adjust the size of your bracelet.

Note: Do not pull too far **unless you want to undo the weave** on your bracelet to deploy.

TO DEPLOY YOUR PARACORD:

1. Unfasten your buckle and start moving the weave towards the buckle with the handcuff key (bigger buckle) until you have a tighter weave and extra room at the other end (smaller buckle) **see Figure 1.**

2. You will see there are two loops below the smaller buckle. Pull those loops while jiggling the buckle to make the loops as large as you can.

3.

4. Take each of the loops and pull them over the top of the smaller buckle. **See Figure 2.** Then pull the two loops through the buckle's webbing (slot) to free the buckle.

5. Holding the remaining cord (bigger buckle) with one hand, grab the paracord with the other hand and pull in opposite directions. **See Figure 3.** This pulls the two loops through the weave freeing the paracord.
